**Description**  
Default nginx configuration file is not valid and if for some reason middlewared fails to create a new configuration file, nginx doesn't run because of the failed error

**Risk**  
We risk breaking default nginx configuration in case middlewared doesn't strat

**Acceptance Criteria**  
Default nginx configuration should pass nginx conf test. This can be done by moving /conf/base/etc/local/nginx/nginx.conf to /etc/local/nginx/nginx.conf and using `nginx -t` to see if it passes test or not
