<b>Description</b>	
PR: <a href="https://github.com/freenas/freenas/pull/2057">https://github.com/freenas/freenas/pull/2057</a>	
Several updates: 1. Fix label parsing for the ifstat output 2. Add sysctl information for all ZFS arc stats 3. Add process stats using "ps" 4. Disable the in-kernel memory zone stats (not useful - save a lot of bandwidth/time)	
Total effect seems to make the script run faster and return more useful info.
