

FreeNAS - Bug #56643

Fix creation of vlan parent interface when using netcli

11/09/2018 07:57 AM - Bug Clerk

Status: Done	
Priority: No priority	
Assignee: William Grzybowski	
Category: Middleware	
Target version: 11.1-U7	
Seen in: TrueNAS-11.1-U6.1	Needs Merging: No
Severity: New	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	
Description	
It seems that we have an issue with creation/up status of parent interfaces of vlan in 11.1/11.2. It appears that when create with netcli no parent interface is created and it is impossible to create the parent interface afterwards so you need to work around with a tuneable. When created through the gui the parent interface is create but you need to manually up the interface.

- Status changed from Ready for Testing to Passed Testing
- Needs QA changed from Yes to No

Test passed in FreeNAS-11.1-U7-INTERNAL11

Created a vlan in the netcli and it was successful. I logged into the gui and the vlan is in the interface (see screenshot)
