

FreeNAS - Bug #58218

Fix traceback when webdav user does not yet exist

11/16/2018 01:45 PM - Waqar Ahmed

Status: Done	
Priority: No priority	
Assignee: Waqar Ahmed	
Category: Middleware	
Target version: 11.3-ALPHA1	
Seen in: Master - FreeNAS Nightlies	Needs Merging: No
Severity: Low Medium	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	
Description When the system boots, middlewared.log contains a traceback where as the config files are being generated, reference to webdav user is made and the user is non-existent at that point.	
Risk We risk breaking configuration of webdav conf files	
Acceptance Criteria When a new system boots for the first time, it should be ensured that middlewared.log does not contain any webdav traceback.
