

FreeNAS - Bug #65007

Have middleware return a more verbose error message on plugin failure

12/18/2018 11:41 PM - Anthony Takata

Status: Done	
Priority: No priority	
Assignee: Brandon Schneider	
Category: Middleware	
Target version: 11.3-ALPHA1	
Seen in: Master - FreeNAS Nightlies	Needs Merging: No
Severity: New	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	
Description

At present, attempting to install the ZoneMinder plugin seems to fail during the post install script, but there doesn't seem to be a way to determine what went wrong. In the GUI, the only indication is the progress dialog box displaying the text "Exception: RuntimeError: occurred, destroyed zoneminder."	
Thankfully it does indeed destroy the partial jail so conflicts don't occur with duplicate names (since you can't choose the name of the jail when creating a plugin for some reason), but it would be nice to know if there's something else that can be done, some syslog entry or whatever that tells me any information at all.

Difficult to get a test case without intimate knowledge of the subsystem.
