Description

VMIMAGE jails of any type (plugin, port or standard) do not have default a gateway set after startup.

```
[shpokas@smtp ~]$ ping www.freenas.org
PING edge.anycastcdn.net (188.165.6.11): 56 data bytes
ping: sendto: No route to host
```

If I try to add default route *after* jail boots, I get "fib 0: Invalid argument"

```
root@smtp:~ # route add -net default 192.168.17.1
route: writing to routing socket: Invalid argument
add net default: gateway 192.168.17.1 fib 0: Invalid argument
```

Tried on LAGG (LACP) interface, did not work, then broke LAGG back to separate interfaces, still the same issue. Also tried to reset network interface, multiple times.

Seeing these lines on boot:
ng_ether_ifnet_arrival_event: can't re-name node epair0b
ifa_del_loopback_route: deletion failed.

A thread (mine) from the forums on this same issue:
