

FreeNAS - Bug #6683

Review Pull-Request on github freenas-plugins Repository

11/18/2014 12:14 AM - Joshua Ruehlig

Status: Resolved	
Priority: Nice to have	
Assignee: Jordan Hubbard	
Category: Middleware	
Target version: N/A	
Seen in: 9.2.1.8-RELEASE	Needs Merging: Yes
Severity: New	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: Yes	ChangeLog Required: No
Needs Doc: Yes	
Description	
See here https://github.com/freenas/freenas-plugins/pull/7	
Thanks

- Assignee set to Sean Fagan
- Target version set to 49

Now that it's been proven that we can process pull requests from github.... :P

#2 - 11/18/2014 09:57 PM - Sean Fagan

I never figured out how.

#3 - 11/18/2014 10:03 PM - Jordan Hubbard

Actually, the following just occurred to me in a kind of a "Duh!" moment:

1. For the freenas-plugins repo, at least, we can change right now to having the master repo on github and make gitserver.ixsystems.com a slave repo because we don't build freenas-plugins often enough to make having the "source of truth" be at iXsystems even worth the overhead. Let's talk to Xin tomorrow about how to make that happen and just reverse the polarity of the flux capacitor (I'm pretty sure it's an electrolytic cap).
2. Once that's done, we can make Joshua R. the principle maintainer of the freenas-plugins project on github and he won't have to send us pull requests. he'll just maintain the whole thing. He's at least 90% of the activity on there right now as it is, so why don't we just face the facts here, hand him the keys, and run awa^H^H^H^H^Hcollaborate in true OSS fashion? I LIKE this idea. I want this idea to happen TOMORROW!
3. We can still do the builds and installs of the plugins locally, though if we can figure out how to give Joshua access to the appcfe upload site, he can even build and upload the plugins! I like that idea too! I'm all for just outsourcing plugins entirely to him without even asking his permission first because if we ask, he might say no, and we don't want to make no an option! :D

#4 - 11/18/2014 10:15 PM - Joshua Ruehlig

I can see where this going... When does the world domination part come into play? ;]

#5 - 12/11/2014 11:18 PM - Joshua Ruehlig

Can this get looked at again at some point in the near future?

I noticed the Plex PBI got update recently and I wanted to get some changes in to it. Hopefully I can get them in by the next time it updates?

- Specifically, I move the data directory from `/usr/pbi/plexmediaserver-amd64/plexdata` to `/var/db/plexdata`.
 - I believe this will make future plex updates through the FreeNAS WebInterface less painful because the plexdata directory (which is often huge) won't be part of the PBI direcotry being tar'ed up.
 - I move the existing directory during post-install so updates should work.

Thanks

#6 - 01/05/2015 09:38 PM - Jordan Hubbard

- Assignee changed from Sean Fagan to Joshua Ruehlig

#7 - 01/05/2015 09:43 PM - Jordan Hubbard

- Assignee changed from Joshua Ruehlig to Jordan Hubbard

#8 - 01/08/2015 02:50 PM - Jordan Hubbard

- Status changed from Unscreened to Resolved

This is now done - Joshua Ruehlig is the owner of the freenas-plugins repo on github and the ixsystems.com local repo for freenas-plugins has been turned off; we will all collaborate on the upstream (only) repo.

#9 - 07/19/2017 08:19 AM - Kris Moore

- Target version changed from 49 to N/A
