

FreeNAS - Bug #68250

New UI not showing interface options

01/07/2019 12:29 PM - Oded Brilon

Status: Closed	
Priority: No priority	
Assignee:	
Category: GUI (new)	
Target version: 11.3-BETA1	
Seen in: Master - FreeNAS Nightlies	Needs Merging: Yes
Severity: New	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: Yes	ChangeLog Required: No
Needs Doc: Yes	
Description The new UI does not show the interface details. This is due to error 401 coming from the API. Additionally, when an error such as this occurs, a logout process is being triggered which logs out the user each time an api error occurs (and an invalid JSON object gets returned).

So does this error only happen when it is about to log you out? Can you see the network interface options for example right after you log in?

I believe I managed to trace it all the way.

It looks like the root cause of it all is the dashboard trying to report on NVME temps and CPU temps. the output returns null. (not sure why as for example smartctl -a /dev/nvme0 does return the correct temps) and so the trace shows:

```
TypeError: Cannot read property 'legend' of undefined  
TypeError: Cannot read property 'getHours' of undefined
```

This causes the following error to repeat itself until : {error: 59, type: null, reason: "Maximum number of concurrent calls (20) has exceeded.", trace: null, extra: null}
main.a32bb4e470efadeae848.js:1

until a timeout happens.

I will do some more digging to try and understand the underlying cause.

What version of FreeNAS are you currently seeing this on?

11.3 nightly

#8 - 02/20/2019 02:39 PM - Anonymous

- Target version changed from 11.2-U3 to 11.3-BETA1

I think this only affects 11.3, I cannot reproduce in 11.2
