<b>Description</b>	
Hitting the Update-Button for the plex-pluginjail instantly results in a "Jail updated successfully" – message without doing anything. Trying to update via jail-shell with "iocage update" gives me a "command not found".	
After upgrading from Freenas 11.1 to 11.2 I've installed the Plex-Plugin from scratch from the new UI. May I've missed something?

Kent: the fix for this issue will occur on the related ticket. Note that you can't view that ticket yet as the dev is still diagnosing the issue and hasn't removed the user's debug yet.
