<b>Reason for Closing:</b>	<b>Support Suite Ticket:</b> n/a
<b>Reason for Blocked:</b>	<b>Hardware Configuration:</b>
<b>Needs QA:</b> Yes	<b>ChangeLog Required:</b> No
<b>Needs Doc:</b> Yes	
<b>Description</b>	
Samba AD DC is running on the FreeNAS main system and requires that BIND is running on the same machine ( <a href="https://wiki.samba.org/index.php/DNS#Which_DNS_backend_should_I_choose.3F">https://wiki.samba.org/index.php/DNS#Which_DNS_backend_should_I_choose.3F</a> ). But I cannot install BIND to the main system.	
How can the BIND9_DLZ option be used on FreeNAS?

#### Associated revisions

##### Revision 7f06325e - 12/11/2014 02:55 PM - John Hixson

Don't allow the DNS to be configurable.

- I was wrong about BIND being able to be used on a different machine. So, only use what is available. Perhaps in the future this can be more configurable, but for now, take it how we give it to you.

Ticket: #7074
