Description	
in 11.3-MASTER this block of code causes a traceback which prevents the webUI from loading.	
<pre>if path.startswith('/dev/'): device = self.middleware.call_sync('disk.label_to_dev', path[5:], geom_scan) x['device'] = device x['disk'] = RE_DISKPART.sub(r'\1', device)</pre>	
The argument being passed to RE_DISKPART.sub needs to be casted to a str() or an error like "Expected string or bytes-like object" is thrown which prevents the webUI from loading.
