<b>Description</b> Plugins aren't updating. the documents I find online suggest updating the jail, but this doesn't do it. I can install new plugins of the same type with the current version, but all plugins are stuck at their installed version. Syncthing and Plex are the ones most tested to confirm the fault but it appears to be across the board. The plugins are the new iocage versions for 11.2

Harry: this is a bug in the UI which should be fixed in the upcoming U3 update. In the meantime, you can update from the CLI using the instructions in <https://www.ixsystems.com/blog/december-freenas-plugin>.
