

FreeNAS - Bug #74551

Regression: Allow SMB to use the same path for multiple shares in 11.2

02/08/2019 06:12 PM - Joshua Serrine

Status: Done	
Priority: No priority	
Assignee: Andrew Walker	
Category: Middleware	
Target version: Master - FreeNAS Nightlies	
Seen in:	Needs Merging: No
Severity: High	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	
Description	
When attempting to use the same path for multiple shares I get the message "A share with this path already exists." in the GUI. Please fix as this is a legitimate configuration and is required for TrueNAS customers.	
I have 2 shares for the same path, one that is writeable (named docs) and one that is readonly (named docs_readonly). Unfortunately, the GUI will not let you do this (this has worked on all builds up to 11.2). In my particular test environment, the shares have been setup and working for a long time, but I cannot edit either share because I get denied due to the error.
