

FreeNAS - Bug #75180

Use arp -an in freenas-debug

02/13/2019 01:05 PM - Caleb St. John

Status: Done	
Priority: No priority	
Assignee: Caleb St. John	
Category: Middleware	
Target version: Master - FreeNAS Nightlies	
Seen in: TrueNAS 11.1-U7	Needs Merging: No
Severity: Medium	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	
Description	
In 11.1-U7, on a pre-production TrueNAS we were handed DNS IP addresses that were not working.	
Since the TrueNAS was configured to use this DNS servers, this showed that arp -a was taking a LONG time to run.	
This caused the freenas-debug process from completing on the passive controller. This ticket is to change the arp -a command to arp -an so it only prints numeric IP addresses and stops trying to use the configured DNS servers.
