Description

System was running version 11.1 update6.
smartd service was running as expected, no issues.
OS was upgraded via UI to 11.2 stable train.
After upgrade was finished and server restarted, smartd-daemon fails to start.
Corresponding message in log: root: /usr/local/etc/rc.d/smartd-daemon: WARNING: /usr/local/etc/smartd.conf is not readable.

When SMART service is enabled in UI, it fails to start and the message above is repeated.

Please let me know what other info is needed for diagnostics.

Thank you FreeNAS Dev team for work that you do.
