Description

When my encrypted disk pool is not mounted, the performance test kinda crashes:

Environment:

Software Version: FreeNAS-9.3-STABLE-201502271818

Request Method: POST

Request URL: <https://192.168.115.12/system/perftest/>

Traceback:

```

```

Exception Type: AttributeError at /system/perftest/

When I mount it, it works though.
