Sergio, the problem seem to be in the list of iSNS servers, which were incorrectly written into CTL configuration file. Hint in UI tells they should be separated by spaces, while in your case I see new-lines.

William, I see there space for improvement. :)

I did, too, but because I separated with space and freenas saved him with lines, assumed that he was normal.
OK, I'd say it s bug at this point.
Pending correction, how can I solve this?
