History

#1 - 03/21/2015 05:37 AM - Philipp Darpe

- File *ixdiagnose.tgz* added

#2 - 03/21/2015 12:03 PM - Jordan Hubbard

- Category changed from 3 to 36

- Assignee set to John Hixson

- Target version set to Unspecified

#3 - 03/23/2015 09:42 AM - John Hixson

- Status changed from Unscreened to Screened

#4 - 03/23/2015 10:10 AM - John Hixson

- Status changed from Screened to 15

Philipp,

Can you attach your `/usr/local/etc/smb4.conf` to this ticket as well?

#5 - 03/23/2015 10:14 AM - John Hixson

I see why you aren't getting users in the UI, they aren't resolving. Seeing your `smb4.conf` will help determine the issue better. I already suspect what is wrong, I just need confirmation.

#6 - 03/24/2015 02:59 AM - Philipp Darpe

- File *smb4.conf* added

Hey, ok cool...

#7 - 03/24/2015 11:42 AM - John Hixson

Philipp,

You should change your idmap backend to 'rid'. Unless you have services for unix installed in your AD, then using 'ad' as the idmap backend will not work for you. Please change it and let me know how it goes.

#8 - 03/24/2015 12:20 PM - Philipp Darpe

Hi John,

i made this change and rebooted the system with no success. Same problem, with wbinfo -t, -u or -g everything looks good but in the UI i can't see any domain user or group.

#9 - 03/24/2015 01:04 PM - John Hixson

Hi Philipp,

Do you have time to do a remote session where I can debug? Do you have teamviewer? Can you install it if not?

#10 - 03/24/2015 01:40 PM - Philipp Darpe

Hey John,

yes we can do a team viewer session, send me an email.

#11 - 03/24/2015 02:10 PM - John Hixson

- Status changed from 15 to Closed: Behaves correctly

I did a teamviewer session with Philipp and found the cause to be the idmap backend was set to "ad" when it should have been "rid".

#12 - 03/24/2015 02:12 PM - Philipp Darpe

Hey John,

Big thank for your support.

Philipp
