Description

Summary says it. Just downloaded the i386 Release 8 final and cannot open the .ISO with zZIP and it does it all.

Is there some other program to use to open this ISO or is it bad?

This one:

Filename:
[[FreeNAS]]-8.0.1-RELEASE-i386.iso
SHA256 Hash:
463832e8c03d0c404ca1a6c443cdf817d48c1527759dda3fe29f0f81c15ce6b

History

- Status changed from Unscreened to Closed

Works for me under [[FreeBSD]]:

```
sha256 [[FreeNAS]]-8.0.1-RELEASE-i386.iso
SHA256 (FreeNAS-8.0.1-RELEASE-i386.iso) = 463832e8c03d0c404ca1a6c443cdf817d48c1527759dda3fe29f0f81c15ce6b
$ mdconfig -a -f [[FreeNAS]]-8.0.1-RELEASE-i386.iso
md0
$ mount_cd9660 /dev/md0 /mnt/
$ ls /mnt
[[FreeNAS]]-i386-embedded.xz      data
boot
```

Try something more mature like Alzip, [[WinRAR]], [[WinZip]], etc.
